# Company Overview

Praetorian Defence Systems is a South African private security and tactical protection company providing structured guarding, armed response, tactical patrols, and specialist support services to residential estates, commercial properties, industrial operations and strategic environments.

Our objective is simple: reduce risk, deter threats, respond decisively, and protect life and assets. We operate with strict discipline, professional standards, and a measurable performance culture that aligns with modern client expectations.

Our operating model combines visible deterrence, intelligence-led patrol planning, control room coordination, and strict incident reporting—ensuring every client receives a predictable, accountable and high-performance service.

## Vision, Mission & Values

**Vision:** To be a leading tactical security solutions provider in South Africa, trusted for discipline, operational excellence, and rapid response.

**Mission:** To deliver reliable and professional security services through proactive patrols, elite training, strict compliance, and advanced control room oversight.

**Values:** Truth • Justice • Righteousness. We promote integrity, accountability, respect, and professionalism across all operational and administrative functions

## Our Strategic Advantage

**Command & Control:** A coordinated response framework where officers, supervisors, armed response units, and control room dispatch work as one operational system

**Operational Discipline:** Uniform compliance, punctual reporting, strict shift handover procedures, and zero tolerance for negligence, misconduct or corruption.

**Visibility & Deterrence:** High-visibility deployment patterns, structured stand-down points, and patrol schedules that discourage opportunistic crime.

**Training Culture:** We enforce continuous training through daily toolbox talks, scenario-based drills, incident simulations, and post-incident learning reviews

**Documentation & Evidence:** Professional registers, logbooks, incident files and escalation trails that protect the client and support investigations when required.

## Industries We Serve

Praetorian Defence Systems provides tailored security solutions across multiple sectors:

**Residential:** Estates, complexes, lifestyle estates, sectional titles, gated communities.

**Commercial:** Office parks, business premises, shopping nodes, warehouses.

**Construction:** Site perimeter control, access control, material protection, night watch.

**Industrial:** Factories, depots, logistics yards, fuel storage environments.

**Retail:** Loss prevention, customer safety, high-risk event coverage.

**Mining:** Perimeter management, access control, escort services, tactical support.

**Key-Points & VIP:** High-value sites and executive protection support where approved.

## Service Divisions (Detailed)

Our service divisions are structured to cover prevention, detection, response and recovery:

- 24/7 365 Armed Reaction Division – Rapid response, escalation control, incident stabilisation.
- Tactical Armed Patrols Division – High-visibility patrols, deterrence and proactive interception.
- Tactical K9 Units Division – Tracking, deterrence, perimeter sweeps and specialised support.
- Alarm & CCTV Installation + Monitoring Division – Technical security systems and monitoring response.
- VIP & CIT Escort Division – High-risk movements, executive escort, route planning support.
- Special Ops Division – High-risk deployments, specialised operations and rapid reinforcement.
- Drone Patrol & Operations Division – Aerial observation support where lawful and operationally required.

## Armed Reaction (24/7 / 365)

Praetorian Defence Systems provides a structured Armed Reaction capability designed around rapid dispatch, controlled engagement, and coordinated scene management.

**Key Functions:** rapid response to panic activations, armed intrusions, suspicious persons, perimeter breaches, domestic incidents, and emergency support.

**Operational Standards:** vehicle readiness checks, radio discipline, body armour compliance, visibility patrols, and strict escalation to control room and management.

**Client Benefits:** reduced response time, visible deterrence, improved reporting, and professional incident closure with evidence-based documentation.

## Tactical Armed Patrols

Our Tactical Patrols focus on proactive crime deterrence through planned routes, hotspot coverage, and visible presence.

**Patrol Methodology:** rotational stand-down points, foot patrol integration, and patrol timing variation to prevent predictability.

**Key Outcomes:** increased detection, improved response positioning, reduced opportunistic crime and stronger community confidence.

## Tactical K9 Units

Our Tactical K9 capability supports perimeter enforcement, tracking, area clearing and tactical deterrence (subject to lawful deployment and handler readiness).

**Typical Deployments:** perimeter sweeps, suspicious persons tracking, high-risk response support, and night deterrence patrols.

**Control Measures:** K9 deployment logs, handler sign-offs, welfare monitoring, and strict chain-of-command authorisation.

## Alarm, CCTV Installation & Monitoring

We provide technical security and monitoring support including alarm response coordination, CCTV installation planning and operational integration.

**Monitoring Support:** alarm activations verification, CCTV live review, dispatch coordination, client notification protocols, and incident record keeping.

**Best Practice:** system testing schedules, incident replay preservation, escalation flow adherence and reporting consistency.

## VIP & CIT Escort Services

Our VIP & escort support is structured for controlled movement, route discipline, and protective presence.

**Services Include:** escort planning, pickup/drop-off security, route risk mitigation, event/venue security support, and tactical standby as required.

**Operational Focus:** safety of principal, clear communications, disciplined positioning, and escalation capability.

## Special Operations

Our Special Ops capability supports high-risk deployments requiring reinforcement, rapid stabilisation and specialist tactical leadership.

**Use Cases:** high-risk removals, targeted patrol operations, high-threat periods, and tactical reinforcement to priority sites

## Drone Patrol & Operations

Drone-based observation may be used as an operational enhancer for perimeter surveillance and risk observation, subject to lawful permissions and site rules.

**Purpose:** extended visibility, rapid observation of terrain, and improved intelligence gathering for tactical planning.

# Control Room & Operations Command Centre

Our Control Room model is built to ensure every incident is recorded, triaged, escalated and closed with proper accountability.

**Control Room Responsibilities:** incident intake, radio communication control, dispatch coordination, situation reporting, client notifications and record management.

**Core Logs:** call logs, OB/occurrence logs, dispatch logs, incident registers, radio communication logs, and escalation trackers

**Operational Approach:** no incident is considered "too small"—every event is logged, assessed and reported according to protocol.

## Dispatch & Escalation Methodology

Praetorian Defence Systems uses a structured escalation methodology to ensure consistent decision-making:

**Step 1:** Receive incident report (radio/phone/panic/CCTV).

**Step 2:** Verify, classify and prioritise (critical/high/medium/low).

**Step 3:** Dispatch closest response resources (armed response, patrol, supervisor).

**Step 4:** Notify client representative when required (SLA rules).

**Step 5:** Stabilise scene and secure evidence (photos, statements, logs).

**Step 6:** Close incident with report submission and follow-up actions.

## Reporting, Analytics & Client Communication

We provide structured reporting that allows the client to measure performance and compliance.

**Daily Reporting:** OB entries, shift handover notes, incident summaries, key activities and patrol confirmations.

**Weekly/Monthly Reporting:** incident trend summaries, service performance overview, resource deployment review and improvement actions.

**Communication Discipline:** no missed situation reports, rapid escalation of suspicious activity, and complete closure notes for every reportable incident.

## Training & Skills Development Programme

Praetorian Defence Systems enforces continuous training to maintain operational readiness.

**Training Approach:** daily toolbox talks, scenario training, supervisor-led refreshers and formal training where required.

**Core Topics:** uniform & presentation, access control procedures, observation skills, radio discipline, incident reporting, emergency procedures, and conflict management.

**Operational Fitness:** armed response teams may perform foot patrols and visibility stand-downs to maintain presence and readiness

## Compliance, Governance & Risk Management

We structure our operations to support legal and regulatory compliance and protect the interests of both the client and company

**Compliance Areas:** PSIRA-aligned operational management, incident documentation, staff conduct management, and operational register controls.

**Client Documentation:** SLA alignment, site-specific SOPs, staff files, registers, and audit-ready reporting

## **POPIA & Information Security**

Praetorian Defence Systems recognises the importance of protecting client, resident and employee data.

Key Controls: access limitation, secure storage of documents, controlled sharing of images/reports, and confidentiality expectations for all employees.

## **Health, Safety, Environment (SHE) Commitments**

We prioritise safety for employees, clients and the public through a controlled operational environment.

Key Areas: hazard reporting, emergency response readiness, incident reporting, and responsible behaviour while on duty

Fire Equipment Control: fire extinguishers and hose reels are controlled according to site procedure and authorised response.

## **Equipment, Fleet & Operational Readiness**

Operational readiness depends on discipline, checks and sign-off.

Vehicle Readiness: supervisor sign-off at shift start and end, cleanliness standards, fuel discipline, and defect reporting.

Equipment Control: equipment registers, issue/return, accountability sign-offs for radios, torches, body armour, handcuffs and other assets.

## Quality Assurance & Site Inspections

Quality assurance is maintained through inspections, performance reviews and corrective action tracking.

Site Inspections: supervisors conduct checks on guard posture, uniform compliance, access control discipline and OB quality.

Continuous Improvement: trends are identified and training is adjusted to address operational weaknesses.

## Professional Conduct & Discipline

Professional conduct is enforced at all times:

- Officers must remain visible and alert; no sleeping on duty.
- No alcohol influence or misconduct while on duty.
- Officers do not leave site until relief reports on duty and handover is complete.
- Incorrect behaviour must be reported—team accountability is enforced.
- Guardrooms must be kept clean and presentable at all times.

## Why Choose Praetorian Defence Systems

**Client Confidence:** professional presentation, disciplined conduct and accountable reporting.

**Response Capability:** 24/7 armed reaction with structured control room coordination.

**Visibility:** tactical patrols designed to deter crime and prevent escalation.

**Training:** ongoing training culture to keep teams sharp, compliant and reliable.

**Operational Systems:** registers, SOPs and escalation structures to protect the client and ensure audit readiness.
